### Claims

1. A laundry net characterized by the fact that it is a laundry net which has an opening/closing part, becomes a bag shape by closing the opening/closing part, and at least one section of the bag-shaped laundry net can be unfolded and form a planar-shaped opening to the bag-shaped laundry net by opening the opening/closing part.
2. A laundry net noted in Claim 1, in which the opening/closing part is formed by multiple connecting sides of the bag-shaped laundry net and a fastening means selected from a fastener, cord, button, snap, or velcro attached to the opening/closing part.
3. A laundry net noted in Claim 1, in which the opening/closing part is formed by the two opposing sides of the bag-shaped laundry net and on the line coupling these two sides and a fastening means selected from a fastener, cord, button, snap, or velcro attached to the opening/closing part.
4. A laundry net noted in Claim 1, in which the bag-shaped laundry net has opposing front and back surfaces and the area of the open part is more than  $\frac{1}{2}$  of the area of the front or back surface.
5. A laundry net noted in Claim 1, which is unfolded into one flat sheet by opening the opening/closing part of the bag-shaped laundry net.
6. A laundry net noted in one of Claims 1-5, which is provided with a latch which latches the bag-shaped laundry net in a folded state.
7. A laundry net noted in one of Claims 1-5, which has an hanger for hanging the laundry within the bag-shaped laundry net.
8. A laundry net noted in one of Claims 1-5 which has a underlay accommodated within the bag-shaped laundry net by being folded along with the laundry.
9. A laundry net noted in one of Claims 1-8, in which the net material composing the laundry net is composed of a net material which is a fiber structural body having a three-dimensional structure comprised of front and back ground weaves and a coupling part which couples the ground weaves, the front and back ground weaves are respectively formed so that the fiber occupying percentage is 10-80%, the space between the front and back ground weaves is divided into spaces in multiple areas according to the coupling part, and the thickness of the fiber structural body is not less than 1 mm.
10. A laundry net noted in Claim 9, in which the thickness of the net material comprising the laundry net is 1-15 mm.

11. A laundry net noted in Claim 9, in which the net material composing the laundry net is composed of polyester fiber, polyamide fiber, aramid fiber, polyacrylonitrile fiber, polyolefin fiber, viscose, rayon fiber, natural fiber, carbon fiber, inorganic fiber, or mixed fibers of these.

12. A laundering method characterized by the fact that the laundry is accommodated within a bag-shaped laundry net composed of the laundry net noted in one of Claims 1-11.

13. A laundering method noted in Claim 12, which executes the washing by using a laundry detergent.

14. A laundering method noted in Claim 12 or 13, which executes the laundering process comprising of manual washing with a liquid detergent and rinsing, or executes each laundering process according to automated washing with a washing machine.

15. A laundering method noted in Claim 12, which dries the laundry along with the bag-shaped laundry net after washing.

16. A laundering method noted in Claim 15, which executes the drying by forming a planar opening by opening the opening/closing part of the bag-shaped laundry net and unfolding at least one section of the bag-shaped laundry net.

17. A laundering method noted in Claim 15, which executes the drying by using the bag-shaped laundry net as a flat platform for drying the laundry.

18. A laundering method noted in Claim 12, which executes the washing by spreading out and accommodating the laundry within the bag-shaped laundry net composed of the laundry net noted in Claim 6, folding the bag-shaped laundry net containing the laundry, and fastening the fastening member so that a folded state is maintained.

19. A laundering method noted in Claim 1, which is a laundering method which uses the laundry net noted in Claim 7 and executes the washing by containing the laundry in the bag-shaped laundry net hung on the hanger.

20. A laundering method noted in Claim 12, which is a laundering method which uses the laundry net noted in Claim 8 and executes the washing by containing the laundry in the bag-shaped laundry net folded in the underlay.
